

Wrap a table in a figure and Typst notices: it labels it “Table”, not “Figure”, and counts tables separately (Table 1).

Quarter	Sales
Q1	120
Q2	148
Q3	165

Table 1: Quarterly sales, in thousands.

For anything Typst can’t guess, set the kind and supplement yourself. These two get their own “Diagram” counter, independent of figures and tables (Diagram 1, Diagram 2).

Diagram 1: A triangular flow marker.

Diagram 2: A single node.
