

Numbered and referenced

Switch numbering on once and every block equation earns a tag on the right. Attach a label in angle brackets to the ones you want to cite:

$$e^{i\pi} + 1 = 0 \tag{1}$$

$$a^2 + b^2 = c^2 \tag{2}$$

Point at one with an @ reference and Typst fills in its number as a live link: Euler's identity is Equation 1 and the Pythagorean theorem is Equation 2. Shuffle the equations and the numbers follow.

Inline math such as $1 + 1 = 2$ is never numbered.
